

March 5 1895

Dear Mrs Gray,

I have none of my father's scientific correspondence, but many of his own letters returned by friends. By the way, these are very charming - and worthy to see the light.

Now and then I find an autograph or some pamphlet, or book sent my father, I will bear you in mind, I have I have N. B. Ward, and I think Inebett,

At our college herbarium we have all Olney's correspondence and if you will let me know your wants, it is possible that something might be found. I will get our excellent Curator, Mr Collins, to look. The correspondence is voluminous, but all systematized, we can tell at once if we have any desired correspondents, I shall certainly take an early opportunity to see you

Collection, I have written to Prof
Bevel to secure a likeness of my
father for you, I shall be happy
to know you possess it,

I have two such lovely
children, I must indeed show
them to you, My boy will be 12
next month, and the Lassie, is
over 9, They are the joy of my
heart, I think Dr Gray knew my
dear old friend - Mr Hunt, I
had not happened to see the death
of Mr Redfield - a great loss,

Cordially ever
W. W. Paisley -
